DESIGN & ARCHITECTURE

Kafka Pack

We are experts in technologies related to Apache Kafka, Apache Cassandra and Apache Spark distributed systems. Thanks to years of experience in the Open Source world, we can guarantee professionalism and reliability, thanks to a team of highly qualified experts.

Design & Architecture Kafka Pack has been designed for the preliminary evaluation of your project goals, analyzing its specific characteristics. The objective of this package is to deliver a tailor-made PoC (Proof of Concept), starting from your specific needs and to evaluate the application of Apache Kafka technologies based on your use case.

You will complete the high-level design phase confident that you have made the right choices in setting up your project to achieve success and that you have identified the most suitable steps to reach your desired results.

DESIGN & ARCHITECTURE KAFKA PACK INCLUDES THE FOLLOWING STEPS:

- **Meeting:** we will organize a first technical meeting with an Apache Kafka expert to know more about your specific project needs and to assess the suitability of these technologies.
- **Technology suitability identification:** we will evaluate the effectiveness of these Open Source technologies.
- **PoC design:** we will design a custom Proof or Concept to meet your needs.
- **Presentation:** we will organize a final meeting online, or in person, to introduce you to our tailor-made project.

This package is generally implemented in about 1-2 weeks. The period may vary depending on the customer and the use case.

RESULTS

- ✓ Identification of key points and project goals to determine if Apache Kafka can meet your needs.
- ✓ PoC design and implementation.
- ✓ Proven integration and design models consulting.
