

The Zencluster logo is positioned at the top left of the page. It features the word "Zencluster" in a white, sans-serif font. The background of the entire page is a dark blue with abstract, glowing light trails and particle effects, creating a sense of motion and technology.

REVIEW & MANAGED PLATFORM

Kickoff Pack

We are experts in technologies related to Apache Cassandra, Apache Spark and Apache Kafka distributed systems. With years of experience in the Open Source world, we can guarantee professionalism and reliability, thanks to a team of highly qualified experts.

Review & Managed Platform Kickoff Pack allows to benefit from a detailed review of Cassandra, Spark and Kafka to discover latent issues and opportunities for improvements. We will also plan the migration of your applications to Zencluster managed environment, without downtime risk.

This pack checks data and usage model, providing information on how to improve and solve any encountered problems. This package aims at assisting you in transferring your applications to Zencluster Apache Cassandra, Kafka and Spark managed services.

REVIEW & MANAGED PLATFORM KICKOFF PACK INCLUDES THE FOLLOWING STEPS:

- **Questionnaire:** the experts will provide you with a questionnaire to assess your specific project needs.
- **Meeting:** we will meet online, or in person, in order to discuss your answers and clarify the questionnaire information, where needed.
- **Data Model revision:** we will review your Cassandra schema, based on our data modeling best practice checklist, to highlight any problem with the modeling itself.
- **Report:** we will review the provided information requesting all necessary clarifications along the way, via email or online meetings, providing a detailed report about the outcome of our review. This report will include a migration plan to enable a transfer to Zencluster managed services without downtime.

- **Q&A:** we will schedule an online meeting to review the report and to ensure understanding of any problem highlighted.

RESULTS

- ✓ Make sure that your application uses Cassandra or Kafka efficiently with optimal availability, and that this use suits your business.
- ✓ Reduce infrastructure costs, where possible, by increasing application performance and availability.
- ✓ Make the migration process as smooth as possible, with no downtime, maintaining stability and consistent performance in Zencluster environment.
